

JÆRBU FERTILISER PUMPS

Simple maintenance. Long service life.

Type T-2L

Type T-2VV

For installation above gate

TECHNICAL SPECIFICATIONS:

Length: Height: Weight: Load capacity: Loading line dimension: Recommended tractor size: 4.45 m. 2.85 m to top of loading line. 500 kg. Approx. 6-10,000 l/min. @ 540 rpm 5" From approx. 35 kW (45 Hp).

For basements below ground level

TECHNICAL SPECIFICATIONS:

Length:4.45 m.Height:1.7 m to top of loading line.Weight:475 kg.Load capacity:Approx. 6-10,000 l/min. @ 540 rpmLoading line dimension:5"Recommended tractor size:From approx. 35 kW (45 Hp).

Variable Angle

TECHNICAL SPECIFICATIONS:

Length: Height: Weight: Load capacity: Loading line dimension: Recommended tractor size:

4.45 m. 2.8 m to top of loading line. 520 kg. Approx. 6-10,000 l/min. @ 540 rpm 5″ From approx. 35 kW (45 Hp)

- Highly efficient centrifugal pump
- Special screw feeder
- 360° continuously rotatable agitator mounted directly on the pump housing, providing efficient agitation
- Special bearing with long service life needs no lubrication
- Valve for switching over under full pressure
- Hot-dip galvanised line

Building dimensions on pump housings: Width: 630 mm – Height: 700 mm

For combination use

TECHNICAL SPECIFICATIONS:

Depth: Weight: Recommended tractor size: Loading line dimension: Load capacity: Up to 4.0 m. 550 kg. From approx. 35 kW (45 Hp). 5″ Approx. 6-10,000 l/min. @ 540 rpm

For vertical installation

TECHNICAL SPECIFICATIONS:

Depth: Weight: Load capacity: Loading line dimension: Recommended tractor size:

From 2.7 m to 4.8 m. 410 kg (applicable to VT-2-32). Approx. 6-10,000 l/min. @ 540 rpm 5'' From approx. 35 kW (45 Hp)

Accessories

Power transmission shaft with wide angle Extra long jib/loading line (max. length 6 metres) Side-mounted load carrier HMV quick release coupling (Triangel is supplied as standard with oblique pumps) Cutter blade Dosing pump for vegetable oil

Wireless remote control

Type VT-2

Our proprietary series of fertiliser pumps first saw the light of day in the mid-1980s.

Our aim was to create a pump with a robust design that was highly flexible, easy to maintain and offered a long service life. This became a success, and this situation does not appear to be changing any time soon.

We sell directly to consumers, cutting out expensive middlemen and making the price of Jærbu pumps highly competitive. We are one of Norway's biggest suppliers of fertiliser pumps.
